

2019 June–July Provisional Discoveries - IASC

A preliminary discovery is the first, original observation of new asteroid. The asteroid must be observed a second time within the next 7-10 days. If it is, then the discovery is changed to provisional status by the Minor Planet Center (MPC). Asteroid discoveries with provisional status are maintained in the MPC database for many years, until there have been a sufficient number of observations to fully determine the orbit. That process typically takes 6-10 years, at which point the asteroid is numbered and cataloged by the International Astronomical Union. Numbered asteroids can be named by their citizen scientist discoverers.

Provisional	Object	Team Members	Team	Location	Date	Status	Linked
2019 ME5	P10P9wM	F. Morossini & B. Sellanes	Observatorio Barros Blancos 2	Uruguay	06/28/19	Provisional	OBB0004
2019 NA12	P10PmAE	B. Valle, J. Basilio, L. Aguiar, M. Andrade	Orion Spur Astronomy Club	Brazil	07/01/19	Provisional	OSA0002
